

Alexa Project: Sporting Events

Alexa will be able to tell the user updates on the sporting events that happen at SSU. It would be able to give highlights to games, the weekly schedule of the games for the sport that they are looking for. It will also be able to tell the user the location on the game, so if the game is on campus it would say what field or court and at what time. It will also be able to tell the user where the game is if it is off campus at one of our competitor's schools.

The sports skill gives updates of the Sonoma State University's sports teams such as game highlights or scores of the school's different athletics teams. When asked what the score is for example, Alexa will give an answer that updates you on a specific sport's score.

Conversation:

User: "Alexa, tell me what sporting events are happening this week."

Alexa: "Volleyball has games this week along with soccer, swimming, and lacrosse."

User: "Tell me the times for the volleyball games."

Alexa: "Volleyball plays on (date) in the wolf den at (time)."

User: "Alexa, give me the highlights of the game."

Alexa: "Which game are you referring to?"

User: "The baseball game."

Alexa: "The Seawolves won in extra innings in the bottom of the eleventh inning with the final score of 6-5."

Utterances:

"What are the sporting events this week?"

"What's happening this week?"

"Does (sport) play this week?"
